As medical practices continue to move towards electronic health records, the ability to exchange patient information with other entities appears to be the next major objective. Locally, a number of medical practices and hospitals have formed a regional health information organization (RHIO) for this purpose. Although still a beta project, Healthcare Information Xchange New York (HIXNY) may have something to offer to you.

Please RSVP to the Medical Society @ 518-456-8571 or via Email nymgma@albmed.org at your earliest convenience. If you do not make a reservation we can not promise you a seat.

THANK YOU!
